Form of Presentation vi

Chapter 1 Getting Started

Chapter Overview 1.1

Initiating NCSA Height-Color Visualizer 1.1

Testing HCVIS 1.1

Exiting HCVIS 1.2

Manipulating HCVIS 1.3

Command Line Parameters 1.4

Chapter 2 Creating Animations

Chapter Overview 2.1

Animation Models 2.1

Creating Animation Scripts for Static Data 2.1

Creating Animation Scripts for Dynamic Time-Dependent Data 2.3

Advanced Choreographing Using Third Party Software 2.4

Chapter 3 Technical Notes

Chapter Overview 3.1

File Formats 3.1

HDF 8-bit Raster Image Format 3.1

HDF 24-bit Raster Image Format 3.1

HDF Scientific Data Format 3.2

Geometric Representations Used by Height-Color Visualizer 3.2

Polygonal 3.2

Relief 3.2

Wireframe 3.2

8-bit vs. 24-bit Color Interpolation 3.3

Lighting Model Equations 3.3

Ambient Light 3.4

Diffuse Light 3.5

Specular Light 3.5

Illumination Models 3.6

Illumination Model 0 3.6

Illumination Model 1 3.6

Perspective Transformation Information 3.7

Future Enhancements 3.8
