# Preface

This licentiate's thesis was done at the Center for Scientific Computing. I would like to thank CSC and my fellow workers for creating a pleasant working environment. I owe special thanks to Olli Serimaa for his help with the potential expansions.

The supervisor and instructor for this thesis has been professor Olavi Nevanlinna. I would like to thank Olavi for the many discussions we have had and for his comments on this work.

The *primus motor* behind this work has been professor Kari Lumme. I would like to thank Kari for introducing me to the subject and for the fruitful cooperation we have had. His encouragement and positive feedback have been of great help in writing this thesis. I am also grateful to Jouni Peltoniemi for his comments on the scattering integral equation.

Last, but not least, I would like to thank my wife Satu for her warm companionship. The hot summer of 1994 was well spent in preparing our theses.

Otaniemi, August 31, 1994
